Resumen:

It is a vertical canyon with a constant water flow, though reduced during the summer months.

Despite the long and steep approach (about 1 hour 30 minutes), this is a beautiful, aesthetic, and technical canyon.

The most interesting section starts at around 1200 m elevation and continues down to the valley floor; above that, there are other rappels of limited interest.

Hidrología:

The canyon carries a consistent water flow all year round.

Acceso:

Park in the village of Fervento (VC) in Val Sermenza.

Acceso:

Walk along the provincial road toward Rimasco, pass the hydroelectric plant on the Sermenza river, and after a few minutes, take the iron bridge on the left to cross the river.

From there, follow trail 381 toward Alpe Chignolo.

After about 1 hour of hiking, cross a small wooden bridge reinforced with supports over a minor stream, then continue the final 3 minutes uphill in the forest along the CAI trail.

At a junction, trail 381 continues left toward Alpe Chignolo; for the canyon, keep right, following stone cairns.

Continue contouring just below trail 381 without losing elevation for about 5 minutes through the forest, until you must climb slightly — keep right here (a short exposed section). From there, traverse gently left and start descending toward the stream through rough, steep terrain (about 40 m elevation loss).
