| <b>Resumen:</b> (traducción alternativa)<br>A long tour that can become tiring towards the exit. As there is only one real highlight in the first two thirds with the 12m slide, the majority of climbers limit themselves to the last part. It is much more attractive, has only 4 abseiling points, the last cascade with 65m; several swimming passages in narrow gorge sections, relatively short walking passages.<br>The bottom line is that it is simply more rewarding in terms of effort and "return".  |  |  |
| <b>Hidrología:</b> (traducción alternativa)<br>Tel. contact Società Elettrica Sopracenerina, www.SES.ch: Tel. 091/7569301<br>Highest point in the catchment area: 2360m 70% meadows and forest 30% rocks   |  |  |
| <b>Acceso:</b> (traducción alternativa)<br>From Locarno --> ri Maggiatal --> main road to the village of Maggia --> at the small shopping center turn right up the road to the church --> turn left over the bridge --> after the S-bend or church take the first road (Al Busgian) to the right --> follow the dead end to the exit --> parking lot at approx. 310Hm (see map).   |  |  |
| <b>Acceso:</b> (traducción alternativa)<br>!!!Attention the entry (Start 2) is on private property, the owners have no joy with us!!!!<br><br>From the parking lot, go straight across the small meadow past the house (left) --> at the 1st signpost on the right along the stone wall --> follow Steineren Weg (first check the water level at the 65m waterfall. To do this, go behind the houses on the right via the small path to the exit) --> after checking the water level, continue up the stone steps through the iron gate --> at the next signpost turn right towards Giro V. del Salto --> then there is a fork in the path --> below the house continue right (stone signpost Maggia) --> follow the path slightly downhill to signpost 3 --> here continue left towards Giro V. Salto --> after a short time there are 2 houses (the house on the right has collapsed) (approx. 460m) --> behind the collapsed house go through high ferns to a large tree where there is an abseiling point (2 ropes around a branch with a ring) --> approx. 450m (alternative entry to the shortened descent. The access takes about 30 minutes)<br><br>If we decide on the access at the water catchment, we continue on the path to there (about 90 min. additional). However, we can also take the path on the orographic left side of the valley to this destination. To do this, we do not go left at signpost 3, but right, cross the Rio Salto on a stone bridge and then take the path to the left at the chapel. This also takes us to the entry point at the water catchment in about the same time. |  |  |

**Recorrido:** (traducción alternativa)

Start the tour below the water catchment at 745m with a jump into the large pool. This is followed by a long walk, with lots of downclimbing and swimming. After about 80 minutes we come to the 12m slide highlight, 30 minutes later we stand above the elongated pool, into which those who prefer the short version rope. Here is the description of the following last part of the ascent:

Arriving at the Baum abseil point (approx. 450m), you rope approx. 45m into the narrow part of the canyon (Attention: make sure to wet the rope beforehand) --> on arrival you stand in hip-deep water --> a swimming passage with a small clamping block in the water follows --> at the exit of the swimming passage there is a small abort which you can first rappel down 11m and jump 7m (stand high up , traverse rope possible) --> after the canyons the canyon opens briefly (several large boulders) before it goes to the next narrow swimming passage (here a large tree root stretches and forms a small siphon) --> this point can be easily climbed over --> another short swimming passage until you are almost below the stone bridge --> at this point there is a bolt on the left which can make walking in the approx. 15m long chute --> below the huge clamping block you can climb approx. 4m can be jumped into deep pools --> short swim to the large boulders where the canyon opens up again --> after the last downclimbs you reach the final waterfall of 65m on the left --> to reach the belay safely, a traversese rope should be set up --> the excellent belay is on the left at head height above the chute (in the middle of the 65m waterfall there is a bolt on the right) --> a 70m rope is recommended for pulling off in large canyons (very nice rappel), It is better to tie a 30m rope to it to be able to pull off outside the pool. --> An emergency exit is left before the final waterfall.

You can exit via the water drainage channel above the final waterfall. You can also deposit a 70 m rappel rope in the final waterfall during access. In this way, you can avoid having to change in the vertical.

Our time requirement for this last part is about 200 minutes.

**Regreso:** (traducción alternativa)

After the large pool at an altitude of approx. 330 m, descend to the right over concrete steps --> the hiking trail leads to the small grape field --> then ascend briefly to the right until you are back at the parking lot.

Way too long way too much swimming for me

2025-08-17 | Alex Arnold |⭐⭐⭐⭐|📖|📌|⭐⭐|🌊 Normal |👍 Completado

Only the lower part done. Beautiful tour (traducción alternativa)

2025-08-15 | MirkoT | |📖|📌|⭐⭐⭐|🌊 Normal |🔴 Salida de emergencia

To make the descent (or plunge?) of the final rappel, ascend from Maggia to the left bank of the stream and at about elevation 420 take a trail to the NW that crosses a bent wire mesh and with the aid of a steel ladder comes directly to the arm on the left bank. (traducción alternativa)

Approach not challenging but close to two hours. First dive from 18 or so very precision it is possible to avoid it by entering a little further upstream. Good weapons Gorge with very swimmable gullies, from the trail orography sheet the horizontal sections are all gullies to swim. The final rappel is majestic, very slippery. If you want to avoid carrying ropes all the way down the creek, it is possible on the approach to access the upper part of the final rappel and leave them there and then pick them up again as soon as you get to the rappel. The updated dam phone can be found in the sign present before the approach trail. (traducción alternativa)

Got in at start 2 according to the guide Nizzola. !!!Attention the entry (start 2) is on private property, the owners are not happy with us!!! Be careful, the wire rope at the stand in front of the bridge is not anchored (only loosely jammed) Otherwise everything is great and very beautiful. (traducción alternativa)

2024-08-20 | Peter |⭐⭐⭐⭐|📖|⭐⭐⭐|📌|⭐⭐|🌊 Normal |👍 Completado

All in order, the water flow gives no problem. The long stretches of swimming and walking on boulders make it quite a tiring course. (traducción alternativa)
