<b>Resumen:</b> (traducción alternativa) Long access, long canyon, quite vertical.		
<b>Hidrología:</b>		
<b>Acceso:</b> (traducción alternativa) From Nice, take the N 202 up the Var for approx. 29 km to Plan-du-Var. Shortly after this village, turn right into the Vesubie valley. 19 km after the turn-off, you pass through Lantosque. After approx. 1.7 km, do not turn off to La Bollene, but follow the road to Roquebillière and take the first turning onto the M69 to Roquebilliere. In the village, follow the road towards "Hameau de Conégo" (towards the hospital). Follow the road past the hospital (do not turn half right). At the fourth hairpin bend, follow the gravel road until you reach a bridge over the streambed. Park here without blocking the traffic. (No obvious parking possibility)		
<b>Acceso:</b> (traducción alternativa) From the car (750 m), take the path on the orographic right bank and walk uphill. Follow the path until it goes steeply uphill in serpentines. At the exit of the hairpin bends, turn left (waypoint 2) and follow the path after two changes of direction, continuing past a house to waypoint 3. Turn right into the valley until you reach the stream.		
<b>Recorrido:</b> (traducción alternativa) The descent begins directly with a fairly vertical section. The high rappel has an intermediate belay after 22 m, then C55. Caution for larger groups! There is not enough room for many people on the transfer, so carry more rope here so that you can rope through.  Emergency exit after approx. half of the route on the left on a small path.		
<b>Regreso:</b> (traducción alternativa) From the stream directly to the car.
