Pays: Österreich / Austria Région: Salzburg Sous-région: Bezirk Salzburg-Umgebung Ville: Faistenau		
Difficulté: moins difficile	Niveau: v1 a3 III	Temps total: 3h15
Temps approche: 10min	Temps tour: 3h	Temps de retour: 5min
Altitude d'entrée: 680m	Altitude de sortie: 580m	Altitude du delta: 100m
Longueur du canyon: 1400m	Rapelle le plus haut: 8m	Nombre de rappelles: 1
Transport: Voiture obligatoire	Type de roche:	Zone de prise d'eau: 100.00km²
Saison:	Orientation: Sud-Ovest	Meilleur moment:
Évaluation: ★ 3.7 (15)	Info: ★ 2.9 (9)	Belay: ★ 2.7 (13)
Avertissements: <i>Eboulement</i> Le 24 juillet 2024, un important éboulement s'est produit au niveau du premier point de saut élevé (aujourd'hui point d'escalade). D'autres chutes de pierres ne peuvent pas être exclues. inactif: <i>Route d'Ebenau fermée en semaine</i> (13.08.25 - 31.12.25) La route menant à l'entrée des gorges (barrage) est fermée pendant la semaine en raison de travaux. Le week-end et les jours fériés, la route devrait toutefois être praticable en règle générale.		
Spécialités: Barrage,		
Matériel: Cordes: 1x20m		
Résumé: (traduction alternative) Deeply cut and year-round water-bearing canyon; very entertaining long tour; protection by dam; several swimming sections; different heights of jumps possible; good physical condition required! in several places rockfall danger; emergency exit in the middle section.		
Hydrologie:		
Accès: (traduction alternative) Coming from Hallein on the WiestalBundesstraße drive in the direction of Ebenau. Shortly after the Wiestalstausee comes on the right side the company "glass and frame" about 200m after the company comes a right. a parking possibility before a barrier, park here shuttle car (do not park on the bike path!!!) --> then follow the highway for about 1.3km to the junction Hintersee. Follow the narrow Hinterebenau road on the right past the Felbertauern school in the direction of Hintersee until you reach the "Seewirt" inn. Approx. 50m before the inn, a small road goes down to the right (180° bend) to the dam parking lot --> park here. Tip: Stop at the Obermayr inn or the Seewirt inn. Both also offer tours/rental material.		
Approche: (traduction alternative) From the parking lot, cross the dam wall to the ortographic left. Here you follow the forest road on the right for a short distance until a small path branches off on the right. The path then leads to a steep secured place with old iron ladder --> here is the entry (loose rock in the ladder area!!!). Alternative access: do not go over the dam wall but follow a small steep path right next to the dam wall down. Then cross the dam outlet and you are in the stream.		

Tour: (traduction alternative)

The Strubklamm is a canyoning tour for people who like jumping and being in the water. Prerequisites for the long aquatic tour are a good physical condition and appropriate equipment--> it is one of the most beautiful hiking, jumping and swim canyons in Salzburgerland with countless jumps in partly deep pools. In the higher parts it is also possible to rappel. In the middle section there is an emergency exit on the right (secured with traverse ropes) that leads up a steep slope to the road (about 50m before the rock tunnel). Towards the exit (before the canyon opens) there is a nice waterfall from the left side of the canyon, where some canyoneers have a massage--> rappel is not necessary for experienced jumpers, but a rope (20m) should always be carried.

Retour: (traduction alternative)

Exit on the right after the bridge --> return on the right via the forest path to the road --> shuttle from the lower parking lot (by car or bike) to the dam parking lot.

Road open at the weekend, All jumps possible except for the first high one due to last year's rockfall Rest fun as always! Some fixed ropes should be renewed (traduction alternative)

2025-08-15 | Bavarian Canyoning | ★★★★★ | 📖 | 🗣️★★★★ | 🌊 Normale | 🍏 Terminé

Road up to the dam was clear. The water temperature was very fresh at first, but it got warmer from the beginning of the second third. All pools were jumpable, except for the first high jump with the rope traverse on the orographic right side. I rappelled the guests as a precaution, but when some overtook us at this point, they jumped. You have to jump really carefully here! The rock was very slippery in places. When the sun is shining and the temperature is right, it's always a great tour! (traduction alternative)

Photo 1: Former jump site destroyed by the rockfall (Attention! Water is not deep!) Photo 2: Water volume reservoir Photo 3: High jump (approx. 8.5m) Photo 4: Waterfall / last inflow As always very beautiful and absolutely worthwhile, especially in the current heat a great way to cool off. Water is very refreshing, no running water at first, but after a short time everything is perfect. Very beautiful play of colors in the sunshine. The consequences of the rockslide are clearly visible, but don't make the canyon any less attractive - there are still plenty of possible jumps. One fixed rope is broken, so I recommend having at least a 10m rope with you, a >=19m rope is needed to control the pool at the 8.5m jump (traduction alternative)

2025-06-21 | Zarnitz | ★★★★★ | 📖 | 🗣️★★★★ | 🌊 Normale | 🍏 Terminé

Mega beautiful! Built-in ropes partly only single threads. All jumps possible. (traduction alternative)

2025-05-09 | Joey CIA | ★★★★★ | 📖 | 🗣️★★★★ | 🌊 Normale | 🍏 Terminé

Good water level, some stands were loose and were tightened again. No more possible jumps at the former large pool after the rockfall. Pool fills up but very blocked. 2 abseiling options. Rope traverses need to be replaced. In general, some parts are more graveled but everything is jumpable after inspection. (traduction alternative)

Automatisch importiert von Descente-Canyon.com für Canyon Strubklamm The nice canyon is full of swimming (long swim).From last year, some stones fell - but the jumps are still possible. Just be careful where you jump - always check the height of the water. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21833/observations.html>)

2024-09-08 | Giga | ★★★★★ | 📖★★★★ | 🗣️★★★★ | 🌊 Normale | 🍏 Terminé

As described: quite cold. All jumps feasible, some fixed ropes. The road was no longer closed, the construction site was still there. (traduction alternative)

2024-09-01 | GeorgB | ★★★★★ | 📖★★★★ | 🗣️★★★★ | 🌊 Normale | 🍏 Terminé

Water quality OK and cool. Too bad that the landslide had to be right next to the beautiful jump. Road still closed until 6.9 according to signs (traduction alternative)

Automatisch importiert von Descente-Canyon.com für Canyon Strubklamm A pretty canyon with some quite long swims. All jumpable. It is rigged due to local canyoning school so easy to access jumps, and abseil even if you forgot your rope. The long swims mean you do need a decent wetsuit to avoid getting cold in the later sections (3/4mm well-fitting worked for me). Water from inlets in the upper half was _much_ colder than the water in the canyon so you get 'cold patches' afterwards.The fun jumps are a bit more spread-out than is ideal, but it's a great introductory canyon with no real dangers.The shuttle-road was closed so you have to go quite a long way round. Not clear if this is permanent. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21833/observations.html>)

2024-07-26 | Corina | 📖 | 🗣️ | 🌊 Normale | 🍏 Terminé

From July 24 to 25, 2024, there was a large rockfall in the upper parts of the Strubklamm gorge (first high jump) (traduction alternative)
