Résumé: (traduction alternative) Bach is known both as Brussine and Macile (Brussine is used on some maps, but the Italians know the stream as "Macile"). Macile is a "pro canyon", i.e. all abseiling points are equipped with Inox chains and glued anchors. In 2021, the canyon was also equipped with SOS badges from the canyoning rescue service. Clean, cold water; beautiful aquatic lime canyon; middle part is more incised; some narrow sections that can be dangerous at higher water levels; check the water level of the canyon and river before the tour; final waterfall 60m, upper part possible but uninteresting because only "block hopping", lower part jump, slide and rappel canyon.		
Hydrologie:		
Accès: (traduction alternative) From Chiusaforte drive in the direction of Sella Nevea. Park on the left immediately after crossing the Raccolana (space for 1 car), or in the village beforehand. From Carnia, take the SS13 towards Tarvisio --> at the exit of the village of Chiusaforte, turn right towards "Sella Nevea"/Raccolana --> follow the road straight ahead --> before the bridge over the Raccolana stream, turn right into a road that leads to a large parking lot. When you reach the embankment at Racolana, turn left and stand at the exit of the parking lot -> there are steps leading up the embankment and down to the streambed of the Raccolana. The way back through the riverbed of the Fella and the Raccolana is a good way out.		
Approche: (traduction alternative) After the bends, a path starts on the right which is marked with a wooden sign "Rio Macile" including canyoning markings. The path first leads slightly downhill parallel to path 638 -> you cross a streambed and then it goes slightly uphill again over the ridge before you then go slightly downhill (insured downhill with barrier tapes) (approx. 520Hm). to the streambed of the Macile/Brussine directly before the first rappel/jump point. The path was newly created by the AIC in fall 2021 and is the fastest and most ergonomic access to the Rio Macile. Fast walkers can easily complete the access in under 30 minutes.		
Tour: (traduction alternative) The first spot (SOS 12) is a rappel (C10), but can usually also be jumped. You can also rappel at SOS 11, but it is also an extremely fun slide that is actually always possible (as of April 2024). The canyon narrows visibly. A few smaller abseils follow. At SOS 8, the last escape route is on the right. This is followed by several smaller abseils, some of which must be completed in the water. The final section is a 60m rappel that leads directly into the Fella riverbed. If no 60m ropes are available, you can exit to the left after the last narrow section and descend via an embankment and stone channel.		

Retour: (traduction alternative)

Follow the Fella upstream until the Raccolana stream flows into the Fella. Cross the streambed of the Raccolana and continue upstream to the right until you reach the concrete steps (about 50m before the bridge over the Raccolana).

Rapports:

2025-10-20 | Florian Heufler | ★★★★★ | 📖★★★★ | 📍★★★★ | 🌊 Normale | 🟢 Terminé

As the Cuestis had hardly any water today, we quickly changed tack and did the Macile! Fun as always, perfect water level, all jumps and slides doable! For two car-car 2h15 min (traduction alternative)

2025-09-26 | Patrick Summerer | ★★★★★ | 📖★ | 📍★★★★ | 🌊 Normale | 🟢 Terminé

Entry jump and subsequent slide very fun, 60m final waterfall also spectacular. Everything was superiøre, nice tour! (traduction alternative)

2025-09-21 | Badegruber Friedrich | ★★★★★ | 📖★★★★ | 📍★★★★ | 🌊 Normale | 🟢 Terminé

Everything in the canyon is great. Jumps and slides are all fine. Be careful with the coordinates of the entry, they are not correct somewhere above in the creek. (traduction alternative)

2025-08-24 | Alfredo | ★★★★★ | 📖★★★★ | 📍★★★★ | 🌊 Normale | 🟢 Terminé

All correct. the rappel/jump number 5 is too shallow to jump. the rest of the rappels and slides are possible. (traduction alternative)

Automatisch importiert von Descente-Canyon.com für Canyon Brussine Equipement : RAS (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22090/observations.html>)

2025-07-27 | Georg Rudelstorfer | ★★★★★ | 📖★★★★ | 📍★★★★ | 🌊 Haut | 🟢 Terminé

Everything top as always but a bit slippery at the moment. First jump and slide possible without any problems. All pools are deep enough. (traduction alternative)

2025-07-23 | Bina | ★★★★★ | 📖★★★★ | 📍★★★★ | 🌊 Normale | 🟢 Terminé

The watercolor is a dream. (traduction alternative)

2025-07-20 | Martin Jasek | ★★★★★ | 📖★★★★ | 📍★★★★ | 🌊 Normale | 🟢 Terminé

Very nice canyon, maybe a little short, but from the start to the end is full of jumps, slides and rappels. Really slippery at the moment, be careful.

2025-07-10 | Marco Heltai | ★★★★★ | 📖★★★★ | 📍★★★★ | 🌊 Normale | 🟢 Terminé

Very nice short canyon very well equipped by AIC (thanks to AIC)

2025-07-06 | Erik Weisz | ★★★★★ | 📖★★★★ | 📍★★★★ | 🌊 Faible | 🟢 Terminé

Great day at Brussine. The first jump we rappelled, but the slide after it was fine. The rappel before the 60m could use a traverse anchor or a sling around a tree on the right, you could only reach the current anchor by jumping/sliding into a small pool, or doing a dangerous, slippery traverse (maybe after heavy rains it's fine). Other than that great protection.

2025-07-05 | Horst Lambauer | ★★★★★ | 📖★★★★ | 📍★★★★ | 🌊 Faible | 🟢 Terminé

All jumps work, the first one is in contact with the ground. The slide is also ok. Very slippery at the moment. Stands all superiøre (traduction alternative)

2025-06-07 | Péter Bonczi | ★★★★★ | 📖★★★★ | 📍★★★★ | 🌊 Normale | 🟢 Terminé

Everything works fine. (traduction alternative)

2025-05-31 | Manni | ★★★★★ | 📖★★★★ | 📍★★★★ | 🌊 Normale | 🟢 Terminé

Top abseiling stands, sometimes a bit slippery, pool deep enough for jumping and sliding (traduction alternative)

2025-05-18 | Andi Schober | ★★★★★ | 📖★★★★ | 📍★★★★ | 🌊 Normale | 🟢 Terminé

Water level normal, good flow; stands all tip top (traduction alternative)
