How do you rate a canyon that is both absolutely stunning and absolutely disgusting at the same time. We had no flowing water, just standing pools of death and mud. Knee deep mud filled with millipedes, bird faeces, and other unknowns. Dead birds in the pools which were occasionally neck deep. The mud sticks to your shoes making it the most weirdly slippery canyon I've ever done. However, it is also one of the most beautiful canyons I've been in. Quite a long stretch of climbing over boulders in the middle. Do yourself a favor and only do this canyon after long periods of rain or snow melt. It was an experience... The hike down from the road takes about 40 minutes.

Automatisch importiert von Descente-Canyon.com für Canyon Fonissa Very nice canyon, also with the grey/brown water and the mud. We needed 3:15 for the canyon, because of the brown water you see nothing under the water.... sometimes you stuck in the mud. Normally we are faster then the specified time.... For the car transfer we recomend only to drive up and walk the piste down. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22525/observations.html>)

A lot of sand and clay at the bottom, which makes it difficult to walk, plus there is a film of sand on all the rocks, which makes everything slippery - plan more time! Park your vehicle at the top of the road! Walking down is faster, the slope is partly washed out. The water is gray due to the many sediments. The canyon is an experience, two dark passages!
