Résumé: (traduction alternative)

O barranco del Salto is a recently conditioned and reinstalled canyon (October 2022), with long rappels and a final 120m split waterfall. The flow can be assessed from the road.

The access has just been fixed, cleaned and marked, as well as completely reinstated. A great job by the installers!

Hydrologie: (traduction alternative)

Possible before the waterfall through the forest

Accès: (traduction alternative)

We will arrive on the N230 towards Vielha, after passing Vilaller and before reaching Aneto and Senet, at pk 141 (in the tunnel), at the exit we have a lay-by on the right from which we can see the waterfall on the other slope. Here we park.

Approche: (traduction alternative)

We will leave by the path that starts right there and goes down to a wall / dam, cross and follow the path to the left about 100m and we will see a "path" that goes up through the forest, we must follow the green dots, as this climb has been conditioned.

Tour: (traduction alternative)

A series of rappels in ramp that leads us to the head of the waterfall.

The waterfall is doubly installed (right and left) on the right is more out of the water, designed for high flows. Be careful not to fall short with the ropes.

The reinstallation has been done on the right, so be careful if we want to make the descent into the water (orographic left) because they have not checked its condition.

Retour: (traduction alternative)

Get to the track next to the wall.
