Well doable with low/normal flow, but the final c190 gets you in the water & working whether you want it or not. Some of the most memorable minutes a canyoneer will ever have. A 2nd anchor for the intermediate 40+- waterfall would be nice. In the upper part some jumps are optional, but mind possible shallow pools. In short, to do once or repeat whenever possible :)

Anchors ok. The stream borders a wildlife sanctuary and the wall is home to endangered bird species. Gamekeepers and forest tenants do not welcome access. Protection period 1.12.-1.July (traduction alternative)

Too much ice and snow at the moment. We got out at the emergency exit before the high wall. We weren't sure what the second anchor on the Multi Pitch would be like. Possibly completely under ice as it was drilled in the dihedral. (traduction alternative)
