Résumé: (traduction alternative) Short canyon with some beautifully carved narrow sections.		
Hydrologie: (traduction alternative) The water flow can fluctuate quite strongly. Sometimes at the beginning of April there is no more water flow (see my photos and video!), then after a short period of heavy rain there may be masses of water that make a descent in the canyon life-threatening, especially because of the wedged pieces of dead wood.		
Accès: (traduction alternative) from Fornaci di Barga on the SR 445 through Filecchio: https://www.google.com/maps/dir/44.0538243,10.5048059/44.043432,10.4817315/@44.0473948,10.4887248,1773m/data see also photo gallery picture no.1 A conversion also seems possible according to the map at https://www.openspeleo.org/openspeleo/misc/fndatabase/os_canyons/3/cart1/torrente_ania1.png , see https://www.google.com/maps/dir/44.0538368,10.5047868/44.0604522,10.5200807/@44.0479379,10.4999051,3745m/data The access path to the river can be seen on the linked map. However, with 2x18 min. duration of the conversion and an even longer walk, this is not worthwhile. After all, the difference in altitude is only 100m for access without conversion.		
Approche: (traduction alternative) see https://www.wikiloc.com/canyoneering-trails/torrente-ania-in-toscana-2046315 at the beginning of the access a shortcut would also be possible, see photo gallery picture 2		
Tour: (traduction alternative) See photos & video		
Retour: (traduction alternative) Turn left before the black pipe that crosses the river. Now follow the pipe, which leads back across the river to the right bank. Follow the bank in a southerly direction to the parked car.

Due to the high water level, the pool was turning at the first rappel/slide (white water up to the opposite wall, no more "calm" spots in the pool). When we got there, there was already a rope with an emergency abseil eighth hanging in the pool (someone had probably already had problems at this point before us...). After 2 attempts to traverse, ascent on the rope and emergency exit orographic left onto the path. Water level pictures of the entry are attached. The wedged tree trunks in the streambed were no problem up to this point, but are certainly to be enjoyed with caution at high water levels! (traduction alternative)
