| Résumé: (traduction alternative) Gully without great interest given its long approach, much better if we do the side channel of the gully. If we take it with water, the 20m waterfall is worth it. Regulation of the Parc Natural del Port: https://parcsnaturals.gencat.cat/es/xarxa-de-parcs/ports/gaudeix-del-parc/consells/regulacio-dactivitats/index.html | | | |
| Hydrologie: No | | | |
| Accès: (traduction alternative) From Mas de Barberáns to Roquetes by the TV3421, in the pk 18,6 we have a detour to the Barranc de Lloret. At the end of this track there is a barrier, there is a place to park. | | | |
| Approche: (traduction alternative) Approach to Bcos Barretes and Barretes Channel We will continue along the same track that towards the southwest goes up to the Font del divendres and the Mas del Cansalader. We will pass a gate and after a couple of bends we will leave the track to go to the right on a path that goes up to Coll Ventós (at the height of the fountain and a water tank). Arriving at the pass we will find a track again, after 250m there is a track on the right, it is the most comfortable place to access Lloret or return if we do not want to do Lloret. We continue straight ahead along the track towards the Coll de Lloret, after almost 2kms from the Coll Ventós we will arrive at the Font del Sapo and in a sharp left curve we exit to the right to the bed of Clot de l'Hospital by the path of "Escarriso de Barretes", a wooden staircase will allow us to avoid a delicate step. We will continue going up until the path crosses the ravine right in a chaos over the interesting rappels. | | | |
| Tour: (traduction alternative) Two very interesting rappels if there is water in the springs and then you can rappel to Lloret. | | | |
| Retour: (traduction alternative) After reaching the confluence with the Bco Orio we follow it and soon we find the access to Lloret where we can return. Another option is to continue and do the Bco Lloret. | | | |
| Coordonnées: Départ du Canyon 40.7731 0.3270 | | | |
