Matériel:

Résumé: (traduction alternative)

Also known as Canal de Les Llebres. It is a long descent, with a combination of cars, laborious, with long but quite steep verticals... pure collecting.

Hydrologie: (traduction alternative)

Without flooding problems, abandoning the descent will be the same as continuing it due to the steepness of the terrain.

Accès: (traduction alternative)

Take the N260 to Sort, once there we turn off on the C13 towards Llavorsi.

Just outside Sort, at the traffic circle, turn left to Llessui on the LV5223. We will leave the detour to Rialp on the right and Olp on the left.

When we get to the detour to Bernui and Sauri (left) we take it and go up to Llessui, just before arriving there is a sharp left turn with a track in front that goes up to the Bordes de Llessui, we will go there and park the return car.

With the access car we return to the road and go down almost to Sorre, here we take the detour to the left to Caregue. Arriving at the village, we turn off to cross Caregue and take the track that comes out from the back.

This track goes to the pass of La Portalla, a zigzagging track that will take us up to more than 2000m, to the track that connects with Espot through the high pastures. We parked at the pass

Approche: (traduction alternative)

From the pass we will take direction SE to the Bony d'Arquer peak and shortly before arriving we will turn right, direction SW to the Canal de les Llebres to enter our ravine.

Tour:

Retour: (traduction alternative)

At the end of the descent, at the confluence with the Berasti, we will have a path on the right that leads to a Borda, soon a bridge allows us to cross the river and continue along the path to climb to the Bordas de Llessui, where we have parked.
