Matériel:		
Résumé: (traduction alternative) Nice ravine near Bitet, Canceigt, ... dwarfed by these giants, it is a simple and accessible ravine except in the thawing season. Little boxed but very continuous and always between a dense and lush vegetation. If the gullies are strong, Gourzy will surely be perfect. Attention: be careful when crossing the Gave d'Ossau, confirm that it is possible to cross before entering.		
Hydrologie: (traduction alternative) Evident throughout the entire route. It is a fairly open descent		
Accès: (traduction alternative) Location Eaux Chaudes We must go to the French town of Laruns. To do this we cross the Portalet and follow the D934 towards Eaux Chaudes. From Pau by the N134 towards Laruns and then by the D934 towards Eaux Chaudes. Location of the Gourzy and Leignieres ravines From Eaux Chaudes towards Portalet, at the turn-off to Goust we will leave the car to return. From the detour to Eaux Chaudes the road crosses the bridge over the Ossau and soon a paved road on the right, we take it and go up to the bridge over the stream.		
Approche: (traduction alternative) Access to Gourzy and Leignieres canyons Directly from the bridge we can rappel from here or go up and climb.		
Tour: (traduction alternative) Descent between trees in a wooded environment. Except for a slightly narrower area, the rest of the ravine is not dangerous.		
Retour: (traduction alternative) Arriving at the Gave d'Ossau, we go upstream a little, cross the river and climb "as best we can" to the road. Never try to go down the Ossau, which flows downstream!		
Coordonnées: Départ du Canyon 42.9450 -0.4393

We were pleasantly surprised by this rappel canyon. We had a bit of sun, it wasn't particularly slippery and the rappels weren't that bad. A good, short tour for an arrival or departure day (traduction alternative)
