<b>Avvertenzas:</b> <b>inattivo:</b> <i>Evitare il disturbo attraverso il canyoning di massa (11.08.25 - 31.08.25)</i> Dopo la RIC 2025 sono stati segnalati grandi gruppi che hanno causato rifiuti nei parcheggi, occupato proprietà private, festeggiato ad alto volume dopo il canyoning e parcheggiato senza considerare l'accesso degli abitanti locali. Le comunità locali sono già arrabbiate! Per evitare conseguenze negative e regolamenti, assicuratevi di agire nel rispetto dell'ambiente e delle comunità locali. Vi preghiamo di utilizzare ogni auto in modo completo per evitare la congestione dei parcheggi, di utilizzare parcheggi alternativi, di essere silenziosi, di limitare al minimo l'uso di fischietti nel canyon, di rispettare la cultura cattolica locale non spogliandovi in modo visibile e di utilizzare abbigliamento per la risalita. Non fate festa dopo il canyoning nei parcheggi e rimuovete i rifiuti per favore!

<b>Accesso:</b> (traduzione alternativa) From the highway junction (Gotthard/Bernardino) in the north of Bellinzona, head north on the N 2. Shortly after passing through Cresciano, turn left and drive to the other side of the valley to Lodrino (approx. 12 km from the highway junction). Drive into the village (right) and after the bridge over the stream take the 3rd road on the left. Park your first car in front of the cemetery (the parking spaces in front of the supermarket and under the trees in the center of the village should not be used). Take the second car north towards Iragna and after almost 2 km (from Lodrino) turn left immediately after the houses of Rodaglio at a business (GPS coordinates: 46°19'02.46 "N / 8°58'19.70 "E ) onto a small road that takes you up to the houses of Legri (a turn-off to the right). - Ignore the access road to the upper Iragna) Continue straight ahead on the small road until it exits onto an open area (helipad) (or continues as a dirt road in a westerly direction). Park the second car here.		

**Avvicinamento:** (traduzione alternativa)

From the parking lot (580 m a.s.l.) on an initially concrete path up to a meadow with a house. Here the path turns left and climbs only moderately high above the canyon to the steel bridge over the middle Lodrino (635 m a.s.l.). Now the path goes up in serpentines, passing the access to the middle Lodrino on the right. At about 800 m a.s.l. the path begins to slowly and steadily climb up the southern slope of the Lodrino into the long valley behind. Passing the former Alpe Dureda (890 m a.s.l.) we reach the side valley Val di Drosina (of Val Lodrino). Here the path turns WNW. At 1050 m a.s.l. a path on the right descends to a destroyed iron footbridge (entry).

**Giro:** (traduzione alternativa)

After smaller rappels in a forest canyon we come to C 50, the only higher rappel. After that open riverbed with some narrower passages. The Lodrino sup. should only be climbed if the water level would also allow an ascent of the lower (and middle) part, since also in the L. sup. are narrow passages that are critical at increased water flow and are not yet secured for an appropriate ascent (2008).

**Ritorno:** (traduzione alternativa)

After a long walking passages, at the access to the Lodrino med. (7 m jump before the ramp with the high rappel), exit to the right and return on the ascent path. Of course, it is possible to add the middle part of the Lodrino and continue until the railroad bridge at the beginning of the lower part.

636m, le chemin n'est pas très marqué mais quand-même visible. Quelques troncs à contourner.Pas mal de  
section de marche sur la partie supérieure. Jolies cascades et jolis saut (important de les vérifier).Partie  
intermédiaire, plus encadrée et plus ludique.Et partie inférieure, magnifique, belle ambiance. (Quelle:
