<b>Specialità:</b> § Divieto,		
<b>Attrezzatura:</b> Corde: 2x40m		
<b>Sintesi:</b> (traduzione alternativa) Varied, aquatic and long rappel canyon in an attractive environment.		
<b>Idrologia:</b>		
<b>Accesso:</b> (traduzione alternativa) From Belluno on the SS 203 towards Agordo. After passing through the village of Mas (8 km from Belluno), continue north along the orographic left bank of the Torrente Cordevole. About 5.5 km after Mas you come to the houses of the hamlet of Casa Candaten, where there is also a camper van site and a picnic area to the west of the road. Park here.		
<b>Avvicinamento:</b> (traduzione alternativa) Cross the Torrente Cordevole and head towards the opposite cut of the Val Fogarè. Here you meet a footpath that you follow downstream in a southerly direction. After a few hundred meters, turn right up a path that will take you in about an hour to the middle entry at the water diversion (the map sketch by P. v. Duin on p. 277 is inaccurate in this regard!). If we want to take the upper entry, we follow the path along Torrente Cordevole further downstream until another blue-marked path goes up the slope on the right. Many blue and a few red points lead first to Col de la Caseta (822 m), then further up to Col dei Pors (1110 m), a flat ice saddle. Here the path gets lost in the high grass. Cross the saddle straight for about 150m until you meet the markings again at a multi-trunked tree. At first keep slightly to the left uphill through mountain pines and pines to soon find a sign 'Monte Alta' on the right side of the ridge. Here, keep to the right and follow the slightly descending path until you reach a small wooden sign 'Canyon'. Follow the direction of the arrow and descend steeply and pathlessly for about 100 meters (keep slightly to the left) until you reach an indistinct cross-country path - here again many blue markers and cairns. Follow the path and the markers across or falling over several ditches to the entry in an impressive rock amphitheater. The path is registered in the OSM. There is also an access via the other (northern) side of Val Fogarè (cf. P. v. Duin).		
<b>Giro:</b> (traduzione alternativa) A succession of almost 30 rappels (superiore & inferiore), no long runs, some possible jumps, a grotto. The middle access and exit point is at a water drainage at an altitude of 620m. Val Fogarè is located in the Parco Nazionale Dolomiti where canyoning is prohibited. The A.I.C. management has been negotiating with the national park administration for some time in this regard.		

**Ritorno:** (traduzione alternativa)

In the streambed under the covered canal out to Torrente Cordevole and across to the far bank to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Fogarè inf Très beau canyon, après avoir bien monté durant la marche d'approche en rive droite, on suit la conduite et le cheminement est simple.Canyon glissant, équipement ancien, mais main courantes présentes et relais en état suffisant, encaissement magnifique (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23065/observations.html>)

Viene riportato che da quota 1150 fino a 640 (inizio parte bassa) tutti gli armi sono ok. Tre ore di avvicinamento. Nell'avvicinamento, dopo il bivio per Mont Alt (seguire la dx in leggera discesa) il sentiero è stato pulito dai grossi rami in mezzo e segnato con ometti.

Automatisch importiert von Descente-Canyon.com für Canyon Fogarè inf Superbe canyon! Eau émeraude, approche facile. Le passage de la grotte est exceptionnel ...Attention,le sentier d'accès et de retour sans traverser le collecteur ( impossible aujourd'hui) a été emporté par les crues du début de semaine, il est maintenant quasiment impossible d'y passer... Automatisch importiert von Descente-Canyon.com für Canyon Fogarè inf Approach path on the right bank has been washed away and was hard to find. We left a cairn witch is visible from the riverbank in front of the canyon.From there on it was a small and overgrown path steep up. Once at the railing it becomes clear.The canyon it self was beautiful with clear blue/greenish water, nice abseils and a few jumps. Some relays are a bit old but all OK. As we missed the turnoff to the entry at 880m and followed other cairns, we entered via the dry streambed at 1000m. Fortunately, this part had just been freshly drilled.... So you have 45min. 6-7abseilers more beautiful canyon. 2h30 outward 4h canyon to the very bottom. (traduzione alternativa)
