Sintesi: (traduzione alternativa) Jump, slide and abseil canyon in conglomerate rock		
Idrologia:		
Accesso: (traduzione alternativa) Take the A-7 from Genoa in the direction of Milan to the north. Take the Ronco Scrivia exit and continue north on the country road towards Serravalle. Approx. 4 km after the exit, the road leads through a hamlet called Creverina. Shortly before the village on the left, a narrow road leads under the railroad to the stream. Park the lower car in a suitable place at the top of the road. Continue with the second car through Creverina and after the last houses, a very narrow road leads off the main road at a steep right angle to the left in front of an old distillery. Follow this uphill and then continue straight ahead at all junctions until the road makes a sharp right turn uphill. A dirt road branches off to the left. Park the top vehicle here.		
Avvicinamento: (traduzione alternativa) The piste leads us, initially high above the stream, to the entry point at a dam with a water drain. We can also walk a little further along the slope and enter at the waterfalls (see photo gallery).		
Giro: (traduzione alternativa) The short, narrow, meandering conglomerate gorge in the middle section with a few jumps and a 10 m toboggan makes up for the previously rather boring march through a flat streambed with a few tree-climbing sections. Last rappel: here a sling at the top of the tree. Clean but relatively cold water.		
Ritorno: (traduzione alternativa) About 100 meters after a last abseil into a slightly larger lake, a path on the left bank leads to the railroad underpass, where the second vehicle was parked.

tutto ok, sentiero di accesso comodo, la mulattiera porta direttamente alla presa dell'acqua, accesso tramite primo tuffo con acqua poco profonda
