<b>Idrologia:</b> (traduzione alternativa) North-facing stream with a small glacier in the catchment area. Has a very narrow turbulent pool, so should not be entered with very high water.		
<b>Accesso:</b> (traduzione alternativa) Park at the exit of the Gigerwald reservoir (the road is passable from the dam between full time and 20 after.		
<b>Avvicinamento:</b> (traduzione alternativa) Follow the hiking trail to the Schrääwislihütte. When you cross the Glasbach stream, join it directly. Alternatively, the stream is also drilled up to 2040m to make it a day tour, but the upper parts are less exciting.		
<b>Giro:</b> (traduzione alternativa) From 1660m there are 2-3 smaller rappels and a technical downclimb to the start of the 55er. The belay is well set up and has space (orographic right). After the big step comes the short gulch of Glasbach with a few 10m to 20m rappels. Unfortunately it is over quite quickly.		
<b>Ritorno:</b> (traduzione alternativa) Back to Tüfwald where you have already passed on the way up. Parlitobel is a very good place to add on after Glasbach, as you save yourself a few meters in altitude if you are already coming from the top.

Automatisch importiert von Descente-Canyon.com für Canyon Glasbach Did it after Panäratöbel because most other canyons had too much water (50mm rain 3-4 days before / snowing above 1300m). 12h45 approach, 14u15 start, 16h down. ~80l/s by about 9°C. We continued hiking up a bit after the first crossing to get in higher, but that was useless. It is mostly rubble almost until the end, but then suddenly a really cool vertical appears with a geyser. All anchors ok. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23598/observations.html>)

Beautiful 50m waterfall followed by a short incised passage. Unfortunately a very short tour. Anchorages all ok. (traduzione alternativa)
