Attrezzatura: Corde: 2x50m		
Sintesi: (traduzione alternativa) Rappel canyon with magnificent views of the sea and the coast.		
Idrologia:		
Accesso: (traduzione alternativa) From Fajã Grande in the west of the island we drive about 2 km to the street village Ponta da Fajã. About 60 m before reaching the church, immediately north of a bridge over an inconspicuous stream, there is a free area on the left where we can park our car.		
Avvicinamento: (traduzione alternativa) We go back on the road 50 m in the direction of Fajã Grande. Here a larger gap opens up between the houses. We turn left and follow the path that initially goes along the left edge of the field bordered with rough stones towards the slope (anno 2016 here wooden signpost "Canyon J. Fraga inferiore/Cao inferiore/Casas inferiore"). The trail enters the coppice forest and moves only slightly uphill at the beginning. After about 10 min and about 20 m, before the trail exits the coppice to the north, a side trail turns left uphill (2016 also trail sign "Canyon"). Now it goes steeply uphill. At elevation 138 a.s.l. we cross the Fraga River at the ruins of a mill. We continue, often over steps, until at 320 a.s.l. a path leaves the main path on the left (2016 signs to the left to Fraga inferiore, to the right up to Cao and Casas, both inferiore). After a few meters we are in the stream (entry).		
Giro: (traduzione alternativa) In quick succession, 8 rappels are lined up, usually with handrails to the anchor (40m - 30m - 16m - 8m - 45m - 7m - 30m - 18m). The stands are comfortable. Permanently you can enjoy the view.		
Ritorno: (traduzione alternativa) After the last rappel first in the stream downhill, then at a house with a round apse out to the right and to the road. On this then to the right a few meters to the car.

Automatisch importiert von Descente-Canyon.com für Canyon José de Fraga Inferior En raison des pluies, tous les niveaux d'eau dans les canyons en Flores sont actuellement élevés, voire très élevés. Nous avons profité d'un pause de pluie aujourd'hui pour faire Fraga inferior. Le chemin d'accès est indiqué ou balisé dans la partie inférieure (bleu jaune sur des pierres dans le même système que les chemins de randonnée). Nous avons mis 45 minutes, par endroits c'était très boueux et raide. Il y a peu de place à l'entrée, pour trois ou quatre personnes au maximum. L'équipement est composé de pitons de grande qualité. Mais le travail a été bâclé, les vis dépassent trop de l'écrou, à un endroit tellement que le filetage est terminé. Une chaîne est montée de manière un peu tordue et l'espacement des trous est souvent trop proche. Mais au moins, tout fonctionne. Les protège-cordes fixes en bois ou en métal sont très utile. Notre descente a duré 2h 45min. Le chemin du retour est extrêmement court, on quitte le cours d'eau peu après le dernier rappel sur le côté gauche, c'est là que commence un sentier qui mène à la route en 2 minutes.
