The access path is a bit chaotic in the streambed, pick the most unpleasant option there that starts the climb. The canyon itself is pretty, except for the long walking sections in the debris.

I added the lower part after the Superiore. It has a few nice sections but not as great as the upper part. Shortly before the exit there is a long walking passage. (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Seixal (inférieur) Chouette canyon, 3eme fois pour moi. Pas d'éboulement plus que ça, la fin à pied passe bien et presente un dernier encaissement joli. J'ai sauté le frac bien arrosé dans la grande cascade de 40. Aucun soucis. Le départ est juste après le tunnel. Pour trouver le départ de la montée, il suffit de traverser la rivière quand le chemin nous y amène. Automatisch importiert von Descente-Canyon.com für Canyon Seixal (inférieur) Fait en intégrale, à 4, en un peu moins de 5h. 4°C au départ au plateau, de l'eau (très froide) dès le départ . Beau canyon, partie inf nettement moins belle à cause des éboulements présents après la grande cascade, sur 500 à 700m ... Automatisch importiert von Descente-Canyon.com für Canyon Seixal (inférieur) Des glissements de terrain massifs se sont produits au cours des derniers mois. A certains endroits, il est effrayant de voir ce qui est tombé dans le canyon...Heureusement, tout l'équipement est encore en place et en bon état.
