Sintesi: (traduzione alternativa) Short, beautiful lime canyon; belays were renewed in May 2024 with glued anchors; short, steep access; can be easily combined with Rio Pliz or Rio Malimberg. Adventurous access to the upper part.		
Idrologia:		
Accesso: (traduzione alternativa) From Chiusaforte, drive into the Raccolana Valley. Approx. 1.2 km after the bridge over the Raccolana stream, there is a large gravel parking place on the right and a power station site on the left. Either park here or better a little further up directly 2m next to the Rivis exit (space for 2 cars with ground clearance + approx. 50m further along the road possibly before the bridge on the right before the barrier again space for 2 cars.		
Avvicinamento: (traduzione alternativa) From the small parking lot right next to the Rivis stream (with the small concrete house in the water) you can judge the amount of water. Continue along the very steep and not always clearly visible path (trail) on the orographic left side, through the forest. After about 20 minutes and a few meters of ascent, you cross over a small rinse to the left and you are already standing directly in the Rivisbach. Entry at 600m. If you want to do the upper part (but it is not interesting), continue up. At a small game feeding station, cross left into the valley of the Rio Rivis (exposed). You reach the bottom of the valley by abseiling twice (1 abseiling point is a narrow gap) - see links + video		
Giro: (traduzione alternativa) The Rivis is a short, rewarding, open, not too difficult lime canyon that was newly equipped with glued anchors in 2024. As an alternative to the belays, some steps outside the water flow can be rappelled from tree slings. The canyon is a good alternative if other canyons have too much water or simply as a half-day tour. Right at the beginning there is a narrow section with a clamping block under which you rappel. This is followed by several abseils in quick succession. At the highest abseil point (approx. 40m) there is a belay on the left and right, whereby an intermediate belay can be used after 15m on the right. There are also 2 more rappels of 25m and 15m before descending over the last rock steps on the right (alternatively: rappel down short steps via anchors). In the shallow streambed you will soon reach the concrete house and the bridge with the parking lot (approx. 440m).		
Ritorno: (traduzione alternativa) Get off just left of the bridge. Depending on parking possibilities, return to the parking lot.

After the water level dropped, it was still possible to do this fun vertical rappel canyon! Would be easily accessible even at high water levels! Top anchors and perfectly secured (traduzione alternativa)

Walked at slightly higher water level. All insurances top! Very nice tour when others have too much water. Can be combined well with Rio Costa. (traduzione alternativa)

Only walked the lower part. Very nice tour when there was a bit more water. Siphon at the second rappel was still negligible. The amount of water on the rappel was manageable. Key point with more water probably the first abseil channel under the rock. (traduzione alternativa)

Perfect little afternoon trip, low water all the anchors are in perfect condition, hiking up the trail so now and then disappears, but with Gaia maps good to find. (traduzione alternativa)
