Specialità:		
Attrezzatura: Corde: 1x25m		
Sintesi: (traduzione alternativa) Short and crisp, relatively aquatic canyon. Deep in places. Many spectators from the footbridge. *Attention, private access is actually prohibited. Be sure to check with the ticket office before entering*.		
Idrologia: (traduzione alternativa) Changes frequently, or at every flood. Shortly before the dark gorge is more of a bypass for inexperienced canyoneers. At the very exit there is sometimes a siphon.		
Accesso: (traduzione alternativa) One car can be parked at the bottom of the gorge parking lot. From there you can drive your car, or a second car, past the Spar market and then immediately turn left up the mountain road, over a cattle grid, to a small gravel parking place on the left, where the road turns off to the right.		
Avvicinamento: (traduzione alternativa) From the upper parking lot, follow the hiking trail towards the gorge and stay left at every fork. You can walk down to the stream at any time, but it is recommended that you only do so at the small (2 meter) waterfall just before the wooden bridge. From the lower parking lot you can walk up the footbridge (through the ticket office).		

Giro: (traduzione alternativa)

From the small waterfall, slide down to the right onto a dry stone. After about another 50 meters, you can jump to the left. After this, there are steel cable belays to the left and right, although it is recommended that you take the footbridge here. Where the footbridge crosses the stream, at the beginning of the dark gorge, you can rappel to the left or right.

There is a "washing machine" below the abseiling point, which looks impressive, but you can slide into it. Shortly afterwards, there is a fixed rope that you should climb up on the left, then slide or jump. The following "slide" in the main current is sometimes backwards, so it is better to climb back up to the left and slide down. After a short swim and climb, you come out of the dark gorge.

It is best to follow the footbridge for about a hundred meters to the next jump, as there is a risk of falling rocks. The last part consists more of walking and climbing with a slide in between until you reach the final section: a siphon is finally on the right, followed shortly afterwards by a slide or rappel on the right depending on the water level, otherwise an access slide or rappel on the left is also possible.

Ritorno: (traduzione alternativa)

The exit point is relatively clear. As soon as you get to the wooden dam, you go back onto the footbridge. Depending on where the car is parked, you either go up or down from the footbridge.
