Specialità:		
Attrezzatura: Corde: 2x50m		
Sintesi: (traduzione alternativa) Attractive rappel canyon with fun potential. Avoid the lower part - waste water from the village is currently being discharged into the stream.		
Idrologia:		
Accesso: (traduzione alternativa) Coming from the highway exit Bellinzona Süd, cross the river Ticino, pass Locarno airport and then straight on at the traffic circle to the T-junction. Turn left here and follow the signs into the Verzasca Valley via Gordola, past the dam, along the reservoir to Vogorno (11.3 km from the crossing of the Ticino). From the center of Vogorno (church of San Antonio) we cycle another 2.4 km along the reservoir and then turn left onto the road to Bassa Corippo (560 m above sea level). With a bit of luck, we will find a place to park the car before Bassa Corippo.		
Avvicinamento: (traduzione alternativa) We hike through the village to its western exit. Here we take the path that leads us up to the hamlet of Costa (750 m above sea level). We follow it further in a south-westerly direction (hamlet of Orxino). We descend to the streambed where the entry point is.		
Giro: (traduzione alternativa) 2 parts: upper A. rappel and jump, lower A. jump and slide. Exit or access before the lower part at the old water drainage (540 m above sea level).		
Ritorno: (traduzione alternativa) Depending on the water level in the reservoir, the exit is either a slide into the water or a rappel followed by a jump into the water of the Verzasca reservoir. Then you swim to the other bank and climb up to the road. However, if you have left the car in Corippo, climb up to the left immediately before the reservoir (when it is completely full, at the mouth of the stream into the reservoir). Through the bushes you reach an old path that you follow up to the village of Bassa Corippo. The exit up to the right outlined by Nizzola in his book Eldorado Ticino involves some exposed ridge climbing at the beginning and is not verified.

Automatic importiert von Descente-Canyon.com für Canyon Corippo Le dernier relais du toboggan était submergé sous le lac (2 mètre). Ludique pour la partie finale ! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22219/observations.html>)

Automatic importiert von Descente-Canyon.com für Canyon Corippo DC-On a mis les cagoules sur la partie inf. On a shunté le T20 final pour ne pas avoir à nager dans le lac en sortant rive gauche. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22219/observations.html>)

Automatic importiert von Descente-Canyon.com für Canyon Corippo Partie inférieure seulement. Le lac est bas, ça fait un joli toboggan (début à la corde pour nous). Pas de problèmes pour remonter en face, il y a même une MC encore en partie sous l'eau. Météo Suisse avait annoncé pas mal de pluie dans la nuit de samedi à dimanche mais aujourd'hui lundi le débit était plutôt DC-. Classico canyon di quellibcon un ambiente bellissimo. Qualche armo danneggiato ma comunque utilizzabile, parte finale molto ludica. Altra perla della zona.
