<b>Specialità:</b> Ghiacciaio nel bacino idrografico,		
<b>Attrezzatura:</b> Corde: 2x40m		
<b>Sintesi:</b> (traduzione alternativa) Glacier gorge with three parts. 1. narrow and deeply incised 2. more open 3. threatening.		
<b>Idrologia:</b> (traduzione alternativa) You can escape between the individual parts via the long-distance hiking trail.  A glacier feeds the canyon. The water level drops as soon as it freezes at 2000 m every day. The canyon is very narrow and has active abseiling points. In the middle of the second narrow section, the canyon receives a spring. The ideal starting flow rate is around 70 l/s for the exit of 100 to 120 l/s.		
<b>Accesso:</b> (traduzione alternativa) From Bern, drive in the direction of Interlaken. Turn off towards Kandersteg. Drive to the village and then continue up the valley towards Selden. You have to pay 10 francs at an automatic toll booth to drive on the road through the canyon. Please note, certain ascent times apply to the one-way road (between 45 and 10 for the ascent). The route leads through tunnels and crosses the Kander. As soon as you come to a passable bridge leading back to RG, take it and park a little further on next to the Forsthaus Waldhus. It is possible to take the cable car up before the toll station. From the top station you have to walk back down to the river.		
<b>Avvicinamento:</b> (traduzione alternativa) Take the path that leads past the forester's lodge and follow the signs to the Sunnbüel cable car, Gemmi Pass. The GR leaves the path to the right and approaches the last waterfall of the third part. The path runs along the side of the mountain and is dizzying in places. You reach a bridge that overlooks the second part. Now you climb up to the right and reach a path. Follow this for 200 m and a small path leads you naturally into the open part of the canyon.
