Specialità: Diga (informare l'operatore),		
Attrezzatura: Corde: 2x 20m		
Sintesi: (traduzione alternativa) Forest canyon in red Verrucano, III. part of the stream		
Idrologia: (traduzione alternativa) https://www.hydrodaten.sg.ch/#3903 (neighboring stream) The water catchment to the Chapfensee swallows up to 1000 l/s. This amount of water can enter the into the stream at any time. The volume of water discharged can be viewed at the Chapfensee kiosk. can be viewed at the Chapfensee kiosk. Experience has shown that a water depth of approx. 8 cm at the measuring point is still still acceptable. However, the final decision to enter the water is at your own discretion. The EW Mels (Tel. 081 725 30 46) as the power plant operator cannot provide any information on imminent flushing. flushing.		
Accesso: (traduzione alternativa) We leave the highway no. 3 (Chur - Zurich) at the Sargans exit (no. 50) and drive towards the center of the village, finally on Wangserstrasse. Straight ahead past the central "Platz", we turn right into the next street - Bachstrasse - and drive along this (it continues into Plonserfeldstrasse, later Seezstrasse) for 3.1 km (from the start of Bachstrasse). Then turn left over the bridge and park your car.		
Avvicinamento: (traduzione alternativa) From the bridge (465m above sea level) on the field path heading SW towards the single house, passing it on the left, we come to a mule track in the forest, follow this 150 (route) meters uphill, then turn left onto a path that leads us further up the mountain. The path walks towards the Cholschlagerbach stream and we follow it up to the road and then join it above the road bridge. It is also possible to cross the Plonser and Tilser roads.		
Giro: (traduzione alternativa) Varied, largely open, beautiful red sandstone, lots of downclimbing. There are also two walkable parts further up, but also a water catchment. Many emergency exits. see photos and video		
Ritorno: (traduzione alternativa) After reaching the bottom of the valley, turn left and take the approach path (past the house) back to the car.

There is no alternative entry above the parking lot. It's just a mess in the wood and only makes the slide longer. Hook placement strange up to the parking lot. After that the stream is OK. Best at the end. Very slippery. Something for the list (traduzione alternativa)

Entry at ca.850Hm where the path leads to the stream after the meadow. The flow was strong, but still manageable. The short rappels are partly in the stream. All ring hooks are present and in good condition. Unfortunately it was quite slippery on this sandstone. (traduzione alternativa)
