Valutazione: ★ 3.1 (2)	Info: ★ 0 ()	Belay: ★ 0 ()
Specialità:		
Attrezzatura: Corde: 2x30m		
Sintesi: (traduzione alternativa) Open rappel canyon		
Idrologia:		
Accesso: (traduzione alternativa) In Almunecar, leave the N 340 and head north on the SO 2 via Jete and Otivar, past the junction of the road to Lenteji to the road bridge (over the Lenteji) in a left-hand bend (14 km from Almunecar). Park the first vehicle here. Continue with the second vehicle up the winding road over the Rio Verde, past an abandoned petrol station at the Mirador de la Cabra Montes and past the signpost on the access road to the Rio Verde. About 450 meters further on (after the traffic signs '40' - 'sharp bends' - 'rockfall'), a dirt road descends to the right. According to Gómez op.cit. there should be a survey pylon 'MP 282' here - perhaps a little further along the road in the direction of Granada - but we did not see it. Park the second car at the junction (approx. 13.5 km from the road bridge, approx. 1000 m above sea level).		
Avvicinamento: (traduzione alternativa) Descend the slope in an easterly direction down to the streambed (up to here by (4WD car if necessary), where you will soon have to overcome a brick slide brake.		
Giro: (traduzione alternativa) After the slide brake, you walk for a long time in the mostly dry river bed and rappel several times until you finally come across flowing water. A little later, the side canyon Palomas joins from the left via a small wall, which - like the Guadajana - can be chosen as an alternative approach (cf. descriptions there).the neighboring canyon to the west is the Rio Verde(-Chorreras) with its headwaters Cortales, Funes and Madronales. Ascent May 2002 integral, exit Oct. 2006 via Guadajana, early Nov. 2009 via Palomas (see description).		
Ritorno: (traduzione alternativa) Go down the streambed between the terraces with the fruit trees (do not climb out onto them (in the finca on the right there is a snappy dog and also a snappy farmer) until you can get out directly onto the track that then leads to the bridge and the vehicle below.

Automatisch importiert von Descente-Canyon.com für Canyon Lentejí Accès par guadajana, eau cristalline qui se perd par tronçons et réapparaît plus loin. Pas mal de désescalades possibles. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2542/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Lentejí Très joli petit canyon très facile. De beaux paysages, belle nature au calme. Avons commencé par l'affluent Guadajana. On a fait du stop pour montrer au village depuis le parking aval. 30 min d'approche. 2h de canyon. 30 min retour. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2542/observations.html>)

2023-11-15 | System User | |📖|📍|🌊 Normale |👍 Completato

Automatisch importiert von Descente-Canyon.com für Canyon Lentejí On a pris une entrée plus classique, un peu au dessus du village de lenteji qui amène directement au départ de l'encaissement. Canyon très bien équipé et très jolie. J'ai préféré à Rio Verde. Merci à Emma du club spéléo local pour la navette fortuite. Sans navette depuis le croisement entre la route principale et lenteji, il y a une route secondaire qui coupe et qui est donné pour une heure à pied. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2542/observations.html>)

Barranco de Lentegi

Tramo de competición 3ª Prueba South Canyoning

Sendero de entrada desde el carril 30 minutos
625 m s.n.m.

FICHA TECNICA:

- R1. Rapel Natural Izq. 4,50m.
- R2. Rapel Químicos Drch. 12m.
- r3. Destrepe 3m.
- R4. Rapel Químicos Drch. 6m.
- T5. Tobogán Drch. 4m.
- S6. Salto de 6m. posible destrepar.
- T7. Tobogán 3m.
- r8. Destrepe 7m con cabecera parabolit por si se quiere bajar por cuerda.
- R9. Rapel Parabolit/spit Drch. 7m.
- R10. Rapel parabolit Izq. 22m.
- r11. Destrepe 3,5m (posibilidad de rapel Parabolit Izq.)
Seguido de destrepe de 6m. (Posibilidad de Rapel natural Izq.)
- R12. Rapel Parabolit Izq. 5m.
- r13. Destrepe 5m. (Posibilidad de rapel parabolit)
Seguido de Tobogan o salto largo 2,50m.
- R14. Rapel parabolit Izq. 7m. (Posible saltar)
- R15. Rapel parabolit Drch. 4,50m. (posible saltar)
- r16. Destrepe por cueva 2m.
- T17. Tobogan 2,5m
- R18. Rapel parabolit Izq. 10m. (Dos rapeles unidos 5+5)
- R19. Rapel Spit Izq. 5m.
- R20. Rapel Spit Izq. 6m.
- R21. Rapel Final de la tubería Parabolit Izq. 7m.
(Entrada con cadena pasamanos)

Longitud del Barranco 2000 metros Desnive 299 metros.
