Valutazione: ★ 3.4 (4)	Info: ★ 2 (1)	Belay: ★ 1 (1)
Specialità:		
Attrezzatura: Corde: 1x30m		
Sintesi: (traduzione alternativa) Hiking canyon with 1 or 2 rappel.		
Idrologia:		
Accesso: (traduzione alternativa) From Lucerne on the A 2 southbound in the direction of St. Gotthard. After 8 km at the exit Interlaken, Sarnen on the A 8 and 12 km further in southern direction until exit 35 (Sarnen Süd). At the traffic circle, take the first exit to the right onto Militärstrasse 700m back in a NNO direction parallel to the highway. Here cross Flüelistrasse and 100m further turn right onto Ennetriederweg. Pass under the highway and approach the Grosse Melchaa. On the bank turn left uphill to the edge of the forest. There park the lower car. With the second car back to the Flüelistrasse, on this to the left, over the highway away and on the Flüelistrasse 3.3 km up to Flüeli. At the beginning of the village, after the right turn, park the second car (700 m above sea level). From the place where the Flüelistr. crosses the highway, a hiking trail also leads up, first to the "Hohe Brücke" over the Große Melchaa, from here 500 m on the road in direction SSW. At a detached house on the right of the road, turn left onto the field path, after 180 m you reach the high bank of the Melchaa and after another 350 m you come along the high bank in a southerly direction to the place where the path leads down into the riverbed.		
Avvicinamento: (traduzione alternativa) We take the path in the direction of ONO, between the houses and come at a solitary house to the wooded slope edge high above the Great Melchaa. Here a few meters to the left (north), the path then descends, first in a southerly, later in an easterly direction, to the river (entry).		
Giro: (traduzione alternativa) River walk in a great canyon with some narrow key points that are dangerous when the water flow is above average (backflow). The rope length is oversized so that you can "rope around" (handrail) at a narrow point and also install sufficiently long drift anchors (backpack). Water catchment in the upper reaches (flushing about every 2 weeks). In view of the disproportionate water risk, caution is required.		
Ritorno: (traduzione alternativa) As soon as a concrete structure becomes visible on the left at the end of a right turn of the river, up here onto a dirt road. Follow it downstream for about 1 km, then cross to the other bank and walk another 150 m to the car.		
Coordinate: Inizio del canyon 46.8746 8.2740 Fine del canyon 46.8866 8.2623 Parcheggio all'entrata 46.8737 8.2691 Parcheggio in uscita 46.8893 8.2544

Very beautiful canyon, but with longer walking passages. A new anchor has been placed at the first rappel so that you no longer have to rappel directly in the water over the blockage. This point can also be jumped. As always, the operators of the power station are very friendly and reliably switch off the automatic system on request. (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Grosse Melchaa Aucune difficulté. Le parking de opencanyon (application) est plus juste que celui du livre. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22990/observations.html>)

2024-07-19 | Silvan | ★★☆☆ | 📖★ | 📍★ | 🌊 Alto | 👍 Completato

The anchor was missing at the first abseil point. It can be improvised using the blocked tree stands. However, rappelling over the blockage in the water at this point was not easy at this water level. This point could be easily bypassed by placing an anchor. After that, the canyon was easily accessible. (traduzione alternativa)

2024-07-12 | System User | 📖 | 📍 | 🌊 Normale | 🚫 Non fatto

Automatisch importiert von Descente-Canyon.com für Canyon Grosse Melchaa Die angegebene Telefonnummer ist korrekt, und die Leute sehr freundlich. Bei Anruf wird die automatische Spülung gestoppt. Das Wasser an der Autobahnbrücke war etwas höher als Knöcheltief, oberhalb der Fassung flossen 6kubik ein und abgelassen wurde an diesem Tag die mindestmenge von 120 litern/sek. Wir waren uns trotzdem unsicher ob die gefährlichen Stellen problematisch sind. Sind im nachhinein auf eine geführte Gruppe getroffen, und haben vernommen dass es beim aktuellen Wasserstand keine Schwierigkeiten gäbe.
