<b>Specialità:</b>		
<b>Attrezzatura:</b>		
<b>Sintesi:</b> (traduzione alternativa) Wild forest gorge that is well worth a visit. Particularly scenic, be sure to include the upper part!		
<b>Idrologia:</b>		
<b>Accesso:</b> (traduzione alternativa) Take the D 907 to Verchaix (between Samoens and Taninges). Park there in the designated parking lot (see GPS data).		
<b>Avvicinamento:</b> (traduzione alternativa) Access on foot possible, but complex to describe. Komoot track upper part: <a href="https://www.komoot.com/tour/2275420176">https://www.komoot.com/tour/2275420176</a> (1 hour, 370 m), Komoot track lower part: <a href="https://www.komoot.com/tour/2275425443">https://www.komoot.com/tour/2275425443</a> (50 minutes, 280 m) You can drive to both entries via narrow mountain roads. From there, follow the forest road northwards up to the stream (5 minutes each)		
<b>Giro:</b> (traduzione alternativa) A rappel from a tree that is tricky to reach through a very fragile rock face marks the entry into the canyon. The waterfalls soon become higher and more beautiful. The exits and intermediate access points are clearly visible. You can see that much of the forest above the tour has fallen victim to storms or sawing. The tour is currently (as of May 2025) well equipped, all anchors are doubled and as rope-friendly as possible.		
<b>Ritorno:</b> (traduzione alternativa) Shortly after the last abseiling points, you can exit to the left into the forest. After a few meters downhill you reach a forest road and then a bridge over the stream. Follow this and continue downhill to the car.

A fine tour that is still doable despite heavy rainfall on the previous days. Wild and pristine. We drilled or tied many new anchor points. The final passage in particular is now properly equipped: C10, 2 pitons with ring on the left, C 25, 2 pitons with ring on the left in front, rope traverse 5 from the old anchor on the right on the rock ledge with the water channel, C 25, 2 pitons with ring on the right outside.
