Specialità:		
Attrezzatura: Corde: 2x 25m		
Sintesi: (traduzione alternativa) Entertaining canyon suitable for beginners. Accordingly much frequented. Carries water for a relatively long time.		
Idrologia: - TODO -		
Accesso: (traduzione alternativa) From Palma de Mallorca, follow the road towards Soller. Turn right at Bunyola and follow a winding road towards Orient. After the mountain pass, drive up several more hairpin bends before you can park after the last leftward hairpin bend. It is also possible to approach from below from Santa Maria de Cami (http://www.wikiloc.com/wikiloc/view.do?id=3901753) See also parking lot		
Avvicinamento: (traduzione alternativa) Follow the marked hiking trail towards Santa Maria through a wide valley to the stream. Several karst springs emerge here, which soon plunge into the depths over a 25m waterfall, the Salt des Freu. Depending on your preference, you can enter above or below the waterfall. If the entry is below, a 30m rope is sufficient for the rest of the route.		
Giro: (traduzione alternativa) The 25m Salt des Freu is followed by another 15m waterfall (both can be bypassed on the left bank) before a longer walking passages begins with a few jumps and slides (if not dry). After about 400m the valley narrows again and the actual canyon begins with a 4m jump into a narrow basin. In the gorge there are many low rappel/jump passages up to max. 15m. Exit after a 5m drop formed by a large rock (slide right or rappel left). A gate in a fence is visible on the left.		
Ritorno: (traduzione alternativa) Go through the gate and follow the path to a picnic area. Turn left here and follow a beautiful path high above the canyon back towards Orient. The locals obviously prefer to climb back through the canyon - lots of canyons in the tufa rock.

Looks like beautiful canyon with water. In September was completely dry which can be dangerous since its hard to get out of some of the last pools if they don't have water. (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Coanegra Malgré les pluies récentes, rien ne coule, les vasques sont à peine remplie et le canyon est plus glissant ne permettant pas de remonter comme habituellement le canyon. Automatisch importiert von Descente-Canyon.com für Canyon Coanegra Most Pools are empty, no flowing water. Some are still filled up to waist deep with cold water so neopren is required. Two dry pools were a bit tricky to avoid. Many trees in the Canyon, only recommended if you know that the water is flowing (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2846/observations.html>)

Everything tip top, except for the lack of water. Geologically very interesting. 2 pools a bit exciting to get out of due to the lack of water. But not a problem in principle. (traduzione alternativa)
