Paese: Österreich / Austria Regione: Vorarlberg Sottoregione: Bezirk Bregenz Città: Riezlern		
Difficoltà: non così difficile	Grado: v3 a3 II	Tempo totale: 3h40
Tempo avvicinamento: 25min	Tempo giaro: 3h	Tempo ritorno: 15min
Altitudine di entrata: 1220m	Altitudine di uscita: 1060m	Altitudine delta: 160m
Lunghezza del canyon: 1700m	Rapel più alto: 24m	Quantità rapelli: 7
Transporto: a piedi	Tipo di roccia:	Area di ingresso: km ²
Stagione: maggio - agosto	Orientamento: Nord	Tempo migliore:
Valutazione: ★ 2.8 (5)	Info: ★ 2.7 (3)	Belay: ★ 2.7 (3)
Specialità:		
Attrezzatura: Corde: 2x 30m		
Sintesi: (traduzione alternativa) The canyon is divided into 3 parts, between which there are long running sections on the adjacent hiking trail. Nice jumps and some rappels in the first and third parts.		
Idrologia: (traduzione alternativa) Relatively high water flow in spring after the snow melts. Hardly any water flow towards the exit of July/beginning of August. Almost no flowing water at the exit of August.		
Accesso: (traduzione alternativa) Main road into Kleinwalsertal. In Riezlern, cross the bridge and turn right towards Ifenbahn/Schwarzwassertal. Drive uphill for about 150 m, then turn right to the sports field. The road goes downhill again. Park at the sports field.		
Avvicinamento: (traduzione alternativa) Follow the hiking trail along the stream until you reach the road. Entry here for the upper part. Entry to the lower section: walk about 1 km along the hiking trail on the orographic\left side of the stream until the stream cuts in again.		
Giro: (traduzione alternativa) 2 parts are above the parking lot, the last part about 1 km below the parking lot. You normally get out after the natural bridge. However, if there is little water, 2 abseils can be made after the confluence. (Not particularly rewarding). Entry via 5m rappel over the bridge. Otherwise you can downclimb to the right. This is followed by a via ferrata to the first rappel, which can usually also be jumped (S7 or C8). This is followed by the highest rappel of the tour, again starting with a rope traverse. This is followed by several possible jumps and smaller rappels, which can also be bypassed via the parallel hiking trail. Be sure to check the pools, especially at the exit! The C20 final abseil follows at the exit of the second part. You can then follow the hiking trail and return to the ascent route and the parking lot.		
Ritorno: (traduzione alternativa) Follow the hiking trail on the orographic left back to the car

Very little water, we were still able to jump a lot. Overall, however, rather short and lots of walking passages between the parts. (traduzione alternativa)

2025-06-16 | Sandra Kistner | ★★☆☆ | 📖 ★★☆☆ | ⚓ ★★☆☆ | 🌊 Basso | 🍌 Completato

Everything OK in the 2 upper parts. Lower part not climbed, rain the day before Photo last Aberseiler 2nd part (traduzione alternativa)

2024-07-23 | Mario Rojer | ★★☆☆ | 📖 ★★☆☆ | ⚓ ★★☆☆ | 🌊 Basso | 🍌 Completato

Ascent at very low water level. Rappels were mostly dry, as the waterfalls dripped rather than flowed. Jumps are mostly possible. In part two, which crosses the ascent route, there was minimal ground contact when jumping. Still easy to walk on. Anchors were easily accessible and intact. (traduzione alternativa)
